WORLD ENERGY COUNCIL

World Energy Trilemma

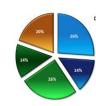

Renewable Energy Energy Storage, EV

Demand Management
Customer Interaction

Resource Management

Climate Resilience

Integrated Energy Network

Connecting all Energy Sources with Customers that's More Secure, Adaptive, Predictive, Dynamic, Flexible, Resilient and More Equitable

Digitally Connected Energy System

Sensors, Information, Communication, Analytics + Artificial Intelligence

Balancing the World Energy Trilemma

More . . .

- Energy with Less Carbon Emissions
- Energy Efficient and Electrification Technologies
- Integrated Energy Networks not just Connected Systems
- Cooperation to Leverage Energy Resources
- Financial Investment Options
- Transparency, Leadership and Community Engagement

Policy, Legislation and Regulation

26th World Energy Council Redesigning Energy For People and Planet Rotterdam, 22-25 April 2024 WORII
